

Series 7500

Lift Assist Sampling Hatch

PROTECTOSEAL®

- ✓ Standard flange 24 in. Can be modified to meet your needs.
- ✓ Bolt pattern to match your tank.
- ✓ Standard opening 16 in.
- ✓ Optional Tri-Clamp Fitting.

Spring Assisted Cover

Spring design significantly reduces the strength needed to lift the cover.

Cam Lock

Self captured, adjustable cam lock to ensure no lost parts and the ability to lock and unlock the cover quickly.

Integrated Handle

For easy lifting.

Principle of Operation

Priorities in the wine industry increasingly include limiting volatile organic compound (VOC) emissions in the aging operation, while at the same time controlling quality and process time.

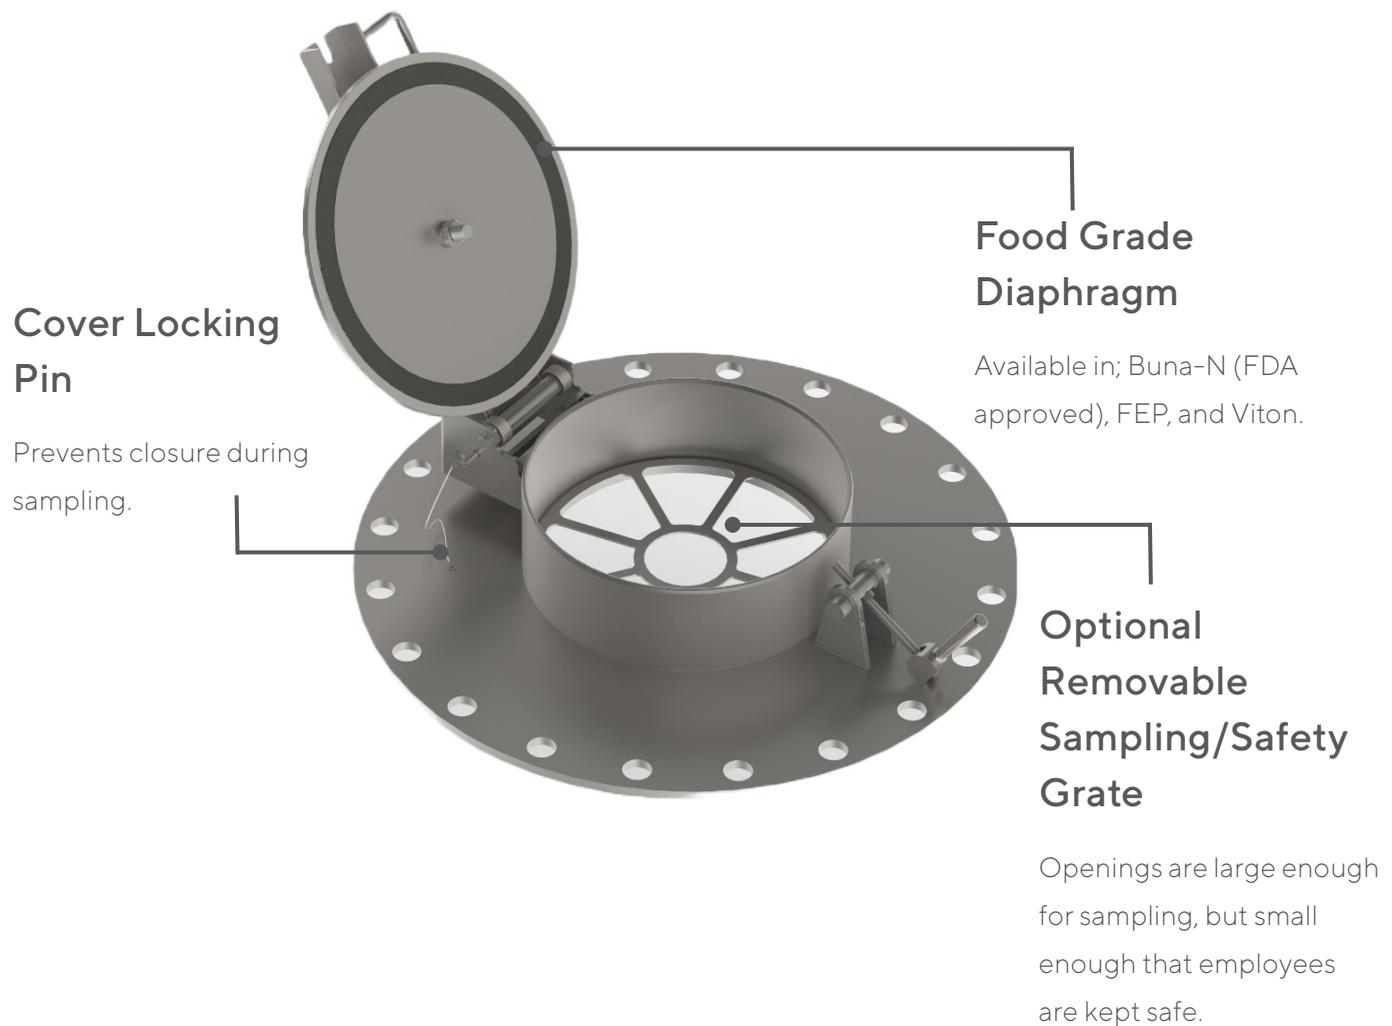

Specifically designed for the wine and spirits industry, Protectoseal has developed a specialized hatch, the Series 7500.

We help your company with the reduction of emissions from wine and spirits fermentation tanks to the maximum extent, preserve and protect the quality, taste, and other unique attributes associated with wine while complying with air quality standards. We deliver these with a 100% tested product guaranteed for low leakage while allowing regular assisted sampling and aeration.

Protectoseal Expertise

Protectoseal offers industry leading technical leadership with its renowned flame and explosion protection for the most diverse and challenging of industrial applications. By utilizing a range of testing facilities, advanced algorithms and computational fluid dynamics (CFD), our research and development team is constantly looking for new ways to challenge the status quo, thus providing best-in-class innovation.

With over 95 years in the business, we have an established sales and service team to support clients with their initial specifications and throughout the product's life cycle.
